

FlexPod – The Innovation Platform

Modernize your data center to accelerate digital transformation

Businesses need modern converged infrastructure to keep up with changing business demands while driving innovation. Refreshing your data center with the latest FlexPod advancements gives you the power to fuel IT innovation and drive continual application and business performance. With modern servers, all-flash storage, policy based networking, and integrated management – FlexPod can power all your application workloads, anywhere you need them. FlexPod from Cisco and NetApp delivers a trusted, global platform for innovation, with unmatched versatility, driving best-in-class converged infrastructure solutions that support enterprises and enable service providers.

FlexPod:

- **A platform for innovation** – Power your modern AI and enterprise applications
- **Unmatched versatility** – Embrace private and hybrid cloud with confidence
- **Trusted worldwide** – Deliver a better customer experience

Benefits

- **Modernize your data center** with next-generation technology enabled by Cisco Unified Computing and NetApp All-Flash Arrays
- **Reduce risk and accelerate your time to value** with enterprise, vertical-specific applications
- **Gain efficiencies** with predictable and assured performance of the platform
- **Unlock the value of your data** to uncover critical insights
- **Automate and simplify** your infrastructure and policy management

“We chose FlexPod for a number of reasons. Standardization and stability were high priorities for us. We wanted the ability to expand and customize the system over time. And we placed a high value on single-call support.”

Larry Luke
Director of Technology, CNYRIC
